Junior FullStack Developer

Overview:
You will be a part of the Web team helping to evolve our technology stack, while delivering and supporting multiple highly available websites, connecting SolarWinds’ customers to our industry leading products. You can see examples of our work on www.solarwinds.com, www.pingdom.com, or www.appoptics.com.

Responsibilities:
- You’ll be contributing to a series of web applications and platforms, microservices, enterprise message queuing solutions, user interfaces and data integrations, in a combined effort to provide highly resilient and personalized solutions to connect our products to our customers.
- As we focus on delivering value each sprint, you’ll continuously see and feel the impact of your contributions.
- Solving business problems and related technical challenges is a big part of your job.
- Your responsibilities include implementing new applications, handling data, debugging and communicating with our business teams and external partners.
- You will work in a team of engineers who like collaborating and helping each other. As a new team member, you might need to learn a lot but do not worry, there will always be someone who will assist you if you need help or share knowledge if you do not know something.
- Your team is international, our official language is English, and we work according to Scrum and agile principles.
- Your tech stack will be: ASP.NET MVC, ASP.NET Core, SiteCore CMS, JavaScript, TypeScript, JQuery, CSS, Sass, Rest Services, Azure PaaS, Azure Service Bus, Visual Studio, Resharper, SQL Server Management Studio, Team City, Jira, Confluence.

Qualifications:
We want you to:
- understand front-end programming concepts,
- understand object-oriented programming concepts,
- understand how web and browsers work,
- have work experience with
  - NET MVC, or ASP.NET Core,
  - HTML5, CSS3, JavaScript (ES6 and newer),
  - SQL or NoSQL databases,
  - services,
  - a source control tool, like Git, SVN, TFS, or similar.

What awaits you, besides top technology and great coworkers?
We offer many benefits, such as growth opportunities and bonuses, but the main benefit is the great team of people working for SolarWinds, the people you can learn from. We promote self-education; that’s why every year, you have ten days to spend by learning new things and not focusing on work. Moreover, we also encourage you to attend conferences, watch on-line tutorials, and talk to mentors. You can also improve your English or Czech in our language courses. Although we are currently working from home, you can visit our comfortable office with tasty coffee,
snacks, fresh fruit, and vegetables waiting for you. Game rooms, billiard, Wii, and PS with VR might be great perks for you, but if you are not into that, you can bike to work or find colleagues who do the same sports as you.

Life is not only about work, and that’s why you can take a deep breath on the 25 annual leave days or on the company-wide holiday on Martin Luther King Jr Day. At SolarWinds, we believe that local communities are important, and that’s why you have two paid days per year for volunteering. We provide three sick days per year and offer localized counselling sessions to help you resolve difficult life situations within the Employee Assistance Program (EAP). You can join our Employee Stock Purchase Program; we contribute towards meal vouchers, offer MultiSport cards, pension or life insurance benefits, and flexible working hours.
