

DevOps Engineer - fresh graduate

We're looking for a **DevOps Engineer** to join our team at Oracle-NetSuite. You will be responsible for developing and maintaining data capturing infrastructure, metrics definitions and engineering tooling solutions for NetSuite and other internal projects, etc.

This position is focused more on a development work using industry leading technologies with a great opportunity to learn and grow. While you may be required to react quickly to operational issues during common business hours, most of your time will be spent on planned projects.

Preferred Qualifications and Experience

- Computer science (bachelor or above)
- Programming or scripting skills (Python or Java)
- Familiarity with Linux-based OS
- Experience with shell scripting
- Experience with version control systems
- Basic knowledge of TCP/IP networking

Nice to Have

- Experience with cloud infrastructure (E.g., OCI, AWS, GCP, Azure)
- Interest in Elasticsearch, Opensearch, Kibana, Grafana tools
- Interest in programmatic data processing and visualization using Pandas, Plotly
- Object oriented software development skills (Java, etc.)
- DevOps mindset and familiarity with some of the DevOps technologies (Docker, Kubernetes, Terraform, Ansible, etc.)

More info and application [here](#).
