

Junior C# Developer for SCM Brno, Czech Republic

We are looking for a talented engineer with strong passion of every aspect of software development, who isn't afraid of working as a real team member and with an emphasis on quality output. We want you to become a member of Server and Configuration Monitor (SCM) team that develops a product that helps customers to monitor and detect changes on their servers and many more.

Responsibilities

You'll work as part of a cross-functional Agile team using the latest tools, methodologies and techniques to solve complex problems. You'll be involved in defining, testing, delivering and supporting features from start to end.

- Design, implement and test new features that make our customers happy
- Deliver high quality code and product by creating automated tests, code reviews and finding solutions to everyday problems

As a Full-stack engineer, you will mainly use Visual Studio and VS Code for backend/frontend respectively. You will work with code mainly in **C#** and **.NET Framework, SQL, TypeScript, Angular, HTML** and **CSS**.

Qualifications

We would like you to be a person who can demonstrate problem solving and apply your technical skills. We want you to have general IT background and some experience in software design and development. We are a multinational company with English being our main communication language, so understanding both written and spoken English is a must. The primary key for us is that you are a team player and hard worker, still willing to learn new things.

What awaits you, besides top technology and great coworkers?

We offer many benefits, such as growth opportunities and bonuses. The main one, though, is a great team of people you can learn from.

We promote self-education (10 learning days) and support you in learning new things – through conferences, learning tutorials, and mentors. We also offer language courses.

You can enjoy comfortable office spaces with tasty coffee, snacks, fresh fruits and vegetables, game rooms, soft chairs, billiard, Wii and PS 4 with VR, and many more.

You can bike to work and find colleagues who do the same sports as you do.

We also provide 3 sick days, meal vouchers, Flexi Passes, MultiSport card, pension or life insurance benefits, flexible working hours.
