

# CYBER WATCH INTERNATIONAL

## ABOUT CYBERWATCH

The U.S. based National CyberWatch Center was established in 2005 at Prince George's Community College in Largo, Maryland to serve as the National Science Foundation's Advanced Technological Education resource center for cybersecurity education and workforce development. In response to growing international interest, the CyberWatch Center was restructured into two organizations. Program development and dissemination in the United States was formed into the National CyberWatch Resource Center. Regional chapter organizations for faculty, students, and practitioners was formed into CyberWatch International.

In Spring 2022, the first CyberWatch International program was a global cybersecurity exchange hosted at the CyberWatch Center's headquarters at Prince George's Community College. Two cohorts of representatives from countries in the Three Seas Region of Europe organized by World Learning in collaboration with the Fulbright Commission attended workshops in Washington, D.C. and New York.

## CYBERWATCH MISSION

Creating and commercializing cutting-edge education, information, and training delivery programs, systems, and content that increase the *readiness* of students and professionals to learn, become certified, and masterfully perform cybersecurity functions and roles. CyberWatch resources and program achievements for fiscal year 2022 are described in the attached annual report.

[Skill Up to Scale Up: Cyber Ready Professionals Consortium and the Skills to Succeed Program \(partnered with Accenture\)](#)

## CYBERWATCH INTERNATIONAL WORKSHOPS

CyberWatch International is planning a series of one-day workshops in cities throughout the central and southern *Three Seas Region* (including Bulgaria, Slovakia, Hungary, Czech Republic) to foster global collaboration in advancing the science of cybersecurity practice and education.

We are excited to co-host events in these countries and collaborate with our international colleagues in the formation of new *International Cybersecurity Student Associations*.

# CYBER WATCH INTERNATIONAL

We would like to invite interested faculty, students, practitioners, and policymakers from throughout the region to join us at these sites for information and details on the programs listed and how they can become CyberWatch International Chapters.

## **WORKSHOP TOPICS INCLUDE**

- CyberWatch International Academic, Student, and Professional Chapter Development
  - (US Chair: Dr. Joseph Squillace)
- Science of Cybersecurity Committee: Research and Scholarship
  - (US Chair: Dr. David Tobey)
- Semester or Year Abroad Faculty/Student Exchange Program
  - (US Chair: Dr. Koudjo Koumadi)
- Three Seas Cybersecurity Capabilities and Careers Symposia: regional conference with a symposium in each of five areas:
  - 1) Teaching Cybersecurity
  - 2) Practicing Cybersecurity
  - 3) Evidence-Based Cybersecurity
  - 4) Cybersecurity Careers and Technology
  - 5) Cybersecurity Competitions, Games, and Simulations
    - (US Chair: William Butler)
- Three Seas Global Exchange Site Selection and Itinerary Committee
  - Planned 3SEAS International CyberWatch Conference (Summer 2024)
    - (Dr. Laura Malave)

If you have any questions or would like to speak with “CyberWatch” directly, please feel free to contact Dr. David Tobey directly at: [dtobey@nationalcyberwatch.org](mailto:dtobey@nationalcyberwatch.org)
