

Supervisor assessment of Bachelor's Thesis

Student: Khudiakov Daniil

Title: Corpus Processing for Foreign Language Learning (id 18763)

Supervisor: Smrž Pavel, doc. RNDr., Ph.D., UPGM FIT VUT

1. Assignment comments

The topic asked for a link to an existing language learning portal and realization of its extension. This was successfully accomplished and the student evaluated the resulting system in a user study with 23 participants.

2. Literature usage

Unfortunately, the survey of scientific background relevant for the topic is rather limited. The thesis references only a few sources that directly deal with realized components, it lacks a wider view on the field.

3. Assignment activity, consultation, communication

The student was active during both semesters and overcame technical difficulties related to the integration of his results into a language learning portal.

4. Assignment finalisation

The thesis text was finished at the last moment. I could provide my feedback to preliminary versions only, not the final one.

5. Publications, awards

6. Total assessment

satisfactory (D)

I appreciate student's activity during the whole year and its enthusiasm in solving technical difficulties. On the other hand, the thesis text is rushed out and it has a negative impact on its quality.

In Brno 1. June 2016
