

Supervisor assessment of Bachelor's Thesis

Student: Pilátová Kateřina
Title: IP Address Activity Monitoring (id 18820)
Supervisor: Bartoš Václav, Ing., UPSY FIT VUT

1. Assignment comments

The assignment is part of the project NEMEA, which is being developed by CESNET. All points of the assignment were fulfilled and the resulting system is ready to be used in practice.

2. Literature usage

Due to the implementation character of the work, there was not much literature necessary. All used study materials were actively found by the student.

3. Assignment activity, consultation, communication

The student was working on the thesis over whole academic year. She worked actively and initiatives. She consulted the progress with the supervisor often. In total, there were absolutely no problems with communication with the student.

4. Assignment finalisation

The thesis was finished in time. Its final content was sufficiently consulted.

5. Publications, awards

6. Total assessment

excellent (A)

The student actively worked on the thesis over whole year. She always consulted her progress and proposed solution with the supervisor in detail. This resulted in a high-quality solution that will be used in practice. In summary, the student's activity during her work on the thesis was exemplary.

In Brno 27. May 2016
