

## Supervisor assessment of Bachelor's Thesis

**Student:** Kaláb Dominik  
**Title:** Dental Chart for Dental Clinic (id 19504)  
**Supervisor:** Beran Vítězslav, Ing., Ph.D., DCGM FIT BUT

### 1. Assignment comments

The topic of the assignment is proposed by the author. He was interested in the topic and its solution offered a number of interesting problems, especially in the area of GUI design. The task itself does not follow up on any project. The achieved results are very good, both the result itself and the procedure that led to it.

### 2. Literature usage

Mr. Kaláb was active and very independent in the search and processing of study materials.

### 3. Assignment activity, consultation, communication

Mr Kaláb approached the solution very conscientiously and carefully. He tried to grasp, describe and consult everything correctly. At first, he looked at the solution with a lot of "programming" view, but gradually he began to pay more attention to user processes, creating a well-designed GUI, which is a result with great added value.

### 4. Assignment finalisation

The work was completed in advance, the content was repeatedly consulted, the recommendations were incorporated.

### 5. Publications, awards

### 6. Total assessment

**excellent (A)**

Mr. Kaláb initially focused on the problem from the point of view of information systems. Over time, he began to focus more on GUI, user processes, GUI design procedures, user consultation, etc. The result is a good usable solution and a big shift in understanding the issue. He handled the work reliably and with great care.
