Supervisor assessment of Bachelor's Thesis

Student: Piwowarski Lukáš

Title: Surveillance Video Search (id 22439)

Supervisor: Smrž Pavel, doc. RNDr., Ph.D., DCGM FIT BUT

1. Assignment comments
The topic required surveying existing video-event search methods used in the surveillance context and designing and implementing a proof-of-concept system, demonstrating advanced search capabilities. The student reached the objectives and realized a solution that provides a basis for future extensions.

2. Literature usage
The student actively collected and used relevant stury material and covered all relevant fields of the work.

3. Assignment activity, consultation, communication
Lukas Piwowarski was very active in both semesters, regularly reported his progress and consulted immediate steps as well the final solution.

4. Assignment finalisation
The thesis was finished a month before the deadline, my comments to the text were very well reflected and integrated.

5. Publications, awards
-

6. Total assessment   **excellent (A)**
The overall activity of the student was exemplary, the resulting system employs standard methods only but it is fully functional and provides a cornerstone for future enhancements.
