Supervisor assessment of Master's Thesis

Student: Mužikovská Monika, Bc.

Title: Support of Run-time Monitoring of Processes in ANaConDA Framework (id 22473)

Supervisor: Smrčka Aleš, Ing., Ph.D., DITS FIT BUT

1. **Assignment comments**
    The goal of the project was to properly analyse, design, and implement solution for support of runtime monitoring of parallel processes. The solution is unique world-wide and allows a research in a quite new topic of dynamic analysis of parallel processes.
2. **Literature usage**
    The student selected her bibliography by herself.
3. **Assignment activity, consultation, communication**
    The student has been really active and participated in regular meetings of Verifit/ANaConDA research group.
4. **Assignment finalisation**
    The project has been finished before the deadline with plenty of time to get a feedback.
5. **Publications, awards**
    The project has been presented at Excel@FIT where she won several prizes.
6. **Total assessment**   **excellent (A)**
    Monika Mužikovská clearly has excelent engineering skills.
