

## Supervisor assessment of Master's Thesis

**Student:** Országh Marián, Bc.

**Title:** Application for OpenShift Platform for Testing of Students Projects (id 22634)

**Supervisor:** Smrčka Aleš, Ing., Ph.D., DITS FIT BUT

### 1. Assignment comments

The goal of the thesis was to design and implement a prototype of a framework usable for teachers while evaluating student projects. The goal has been fulfilled and the implemented solution is potential to further development.

### 2. Literature usage

The student selected the bibliography by himself. The literature in the given topic is mainly in online documents and manual of used technology and tools.

### 3. Assignment activity, consultation, communication

The student has been active and regularly discussed his progress.

### 4. Assignment finalisation

The whole project has been finished a month before the deadline. I had plenty of time to give him a feedback.

### 5. Publications, awards

### 6. Total assessment

**excellent (A)**

The activity during the whole year and the implemented solution clearly prove engineering skills of the student.
