

## Supervisor assessment of Bachelor's Thesis

**Student:** Muzikář Martin

**Title:** Tool for Effective Management of Web Application Tests (id 23124)

**Supervisor:** Beran Vítězslav, Ing., Ph.D., DCGM FIT BUT

### 1. Assignment comments

The higher complexity of the assignment lies in the need to get acquainted with advanced tools for testing web applications and the use of advanced tools to design a new web application.

### 2. Literature usage

The student actively and independently acquired and used relevant literature.

### 3. Assignment activity, consultation, communication

Mr. Muzikář was very interested in the topic and devoted a high amount of time and energy to his solution. During consultations, that were not frequent, he always presented a considerable amount of new work, specified the problems well with a number of ideas for their solution. In addition to our consultations, he also used his professional contacts in the community dedicated to this issue.

### 4. Assignment finalisation

The work was completed well in advance and the final content was sufficiently consulted.

### 5. Publications, awards

### 6. Total assessment

**excellent (A)**

Mr. Muzikář proved in solving his work great independence and the ability of professional progress in solving fundamental and technical problems. During the collaboration, the "wild ideas" about the target tool quickly became clearly specified and professionally grasped, and thanks to the diligence and hard work of the student, the tool was repeatedly tested and tuned in collaboration with relevant users.
